# QUY CHUẨN KỸ THUẬT QUỐC GIA VỀ AN TOÀN CHÁY CHO NHÀ VÀ CÔNG TRÌNH

NATIONAL TECHNICAL REGULATION ON FIRE SAFETY OF BUILDINGS AND CONSTRUCTIONS

On May 19, 2021, the Ministry of Construction issued Circular 02/2021/TT-BXD promulgating QCVN 06:2021/BXD national technical regulations on fire safety for houses and works. Applicable to organizations and individuals involved in construction investment, management and use of civil and industrial houses in the territory of Vietnam. Accordingly, when designing houses, there must be structural solutions, ground layout - space and construction techniques.

# FIRE-RESISTANCE SOLUTION FOR STEEL STRUCTURE WITH KHS PANELS

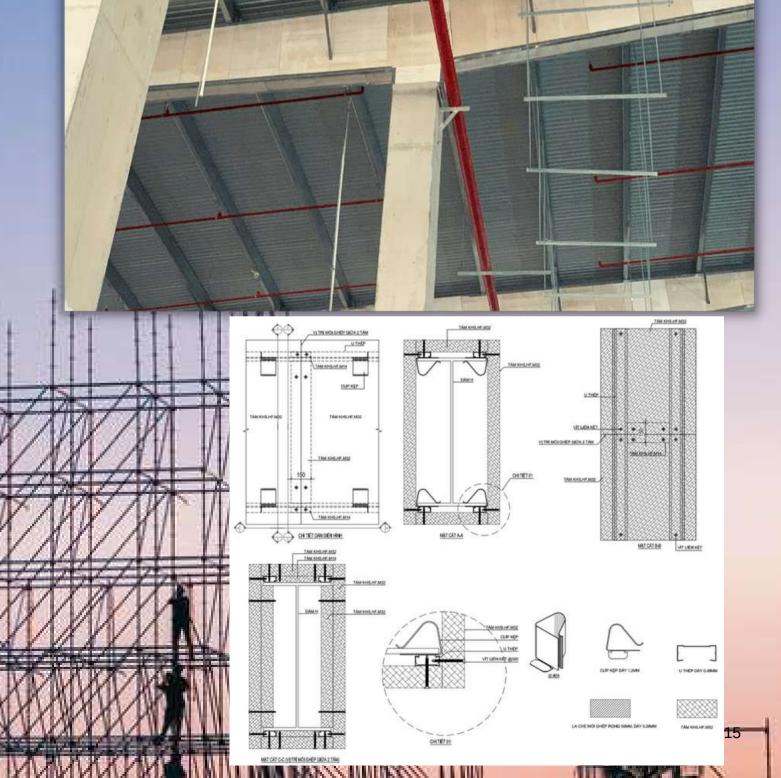

High durability in damp environment

Meeting the Fire Prevention & Fighting standards

Convenient construction: can be cut, drilled, screwed, glued on a variety of finishing materials

## FIREPROOFING PAINT SOLUTIONS FOR STEEL

- Quick-drying (2-3 hours) at 25°C.
- Cost saving, Non-poisonous, lead-free, mercury free...Convenient and safe for users.
- Can paint ( outdoor and indoor)
- After burning it should not leave much ash.

AMAVI SOLUTION is proud to be the exclusive regional distributor partner of products of Vietnam New Technology Solutions Joint Stock Company.

Fireproofing paint product of Vietnam New Technology Solution Joint Stock Company belong to the group of difficult-to-burn materials, certified and licensed by the Vietnam Fire and Rescue Police Department No. 4533/KD - Fire Prevention - P7

# CPVC PIPES & FITTINGS ACCESSORIES USEING IN FIRE FIGHTING SYSTEM

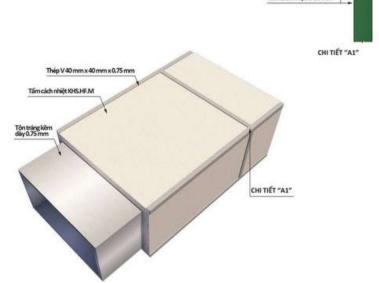

- Mon-combustible.
- **Do not pose flame**
- Do not cause an odor
- Easy installation and a low installed cost
- Corrosion-free

- CPVC pipes & fittings under decree QCVN 03:2021/BCA are used for automatic Sprinkler system.
- CPVC pipes & fittings are meeting technical standards and the testing method under decree TCVN 12653-1 and 2:2019

#### **FIRE-RESISTANT AIR DUCT**

| El Standard             | El 30 minutes | El 45 minutes | El 60 minutes | El 120 minutes |
|-------------------------|---------------|---------------|---------------|----------------|
| Thickness of KHS panels | 14mm          | 16mm          | 18mm          | 2x14mm         |
| Thickness of Tole       | 0.75mm        | 0.75mm        | 0.75mm        | 0.75mm         |

Circulating air, bringing the fresh air

Ability to remove poison gas, bad smells, moldy

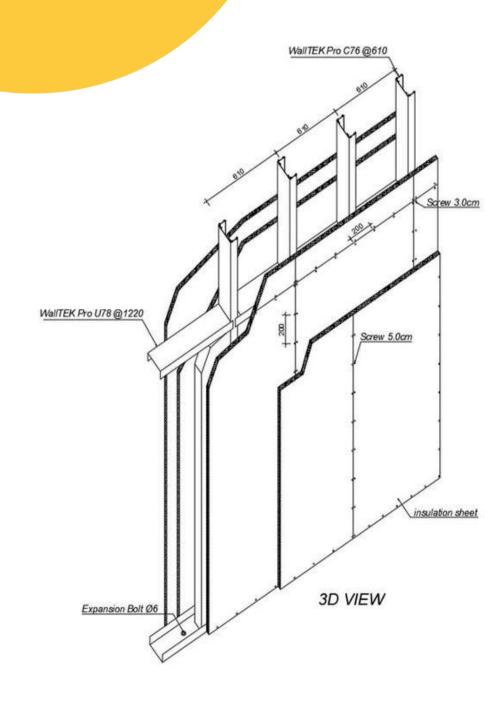

Good temperature stabilization, fire protection, good manage situation when there is a fire

According to the latest "national standard on fire safety for houses and buildings under decree " QCVN 06:2021/BXD, the air ducts need to meet regulations on fire resistance, and have fireproof ability, especially EI standards. . The design material of the smoke pipeline and the fire resistance limit of the smoke pipeline is specified depending on the installation location.

#### FIRE RESISTANCE WALL

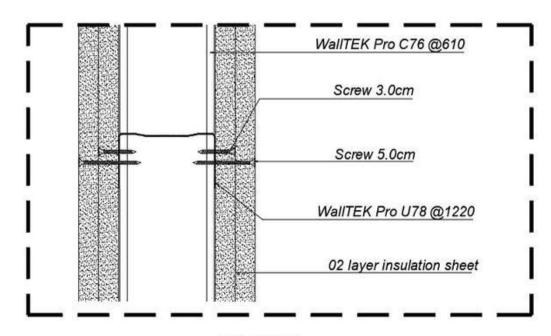

Maintain the building's integrity for longer has always been the primary goal of fire protection. Fire baffles are an effective solution to help fire-blocking structures retain their integrity longer in the fire. Just with more time, damage to persons and property may be limited.

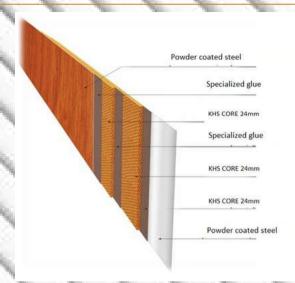

Fire resistence wall, insulation is an important part of building to keep the structure for as long as possible in the event of a fire or explosion.

The application of the Fire resistant Partition system has been tested and meets the latest requirements on fire protection, meeting QCVN 06: 2021/BXD standards.

**DETAIL** 

## FIREPROOF ROLLING SHUTTER

## STRUCTURE OF FIREPROOF ROLLING SHUTTER

**Door control part:** Motor system, interlock, battery, pulley, chain and bracket for door spokes.

**Guide part:** Door rail is installed into the wall by a combination of folding steel

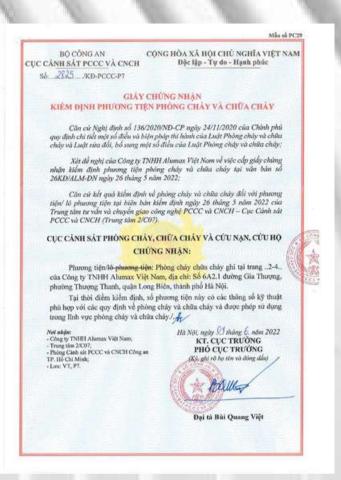

**Door spokes:** The spokes are made of thick steel on both sides, in the middle is a layer of KH Shield to prevent fire.

- Operate Well, Effective: It can resist high temperature, at the same time, at the same time, high temperature inductive sensor the door will close automatically protect safe warehouses
- The doors have fast operating speed: The door's speed element is enhanced to quickly isolate the fire and prevent the air supply to the fire..
- Safety for the user: The door uses powder coating to help protect users from electrical leakage caused by too high voltage. When a fire occurs, the door will close quickly to ensure the safety of users.
- Good durability and longevity: Roller shutter slat is made of super-hard steel alloy, so it has the ability to last over time and against the elements of fire and explosion, ensuring the safety of many stalls around.

The door can automatically close when there is a fire alarm signal . They have the effect of preventing fire from spreading to other areas, create a fire prevention area and safe for people to evacuate in time. Therefore, this is an important and indispensable part of office buildings, factories, manufactory, apartments, basements, schools, etc.

Fireproof rolling shutter products of Alumax Vietnam JSC belong to the group of difficult-to-burn materials, certified and licensed by the Vietnam Fire and Rescue Police Department No. 2825/KD - Fire Prevention - P7

#### **EXCLUSIVE DISTRIBUTION AGENT**

AMAVI SOLUTION is proud to be the exclusive distributor partner in the Southern region of rolling doors, fireproof steel doors of AMLUMAX Vietnam Joint Stock Company.

### **SMOKE CURTAINS & FIREPROOF CURTAINS**

Smoke curtains & fireproof curtains screens are made of good heat-resistant material, sealed, not letting smoke escape. With the ability to widen the area, along with the ability to fold when not in use and automatically fix the fire, making the difference of the product

Application of smoke curtain to prevent fire:

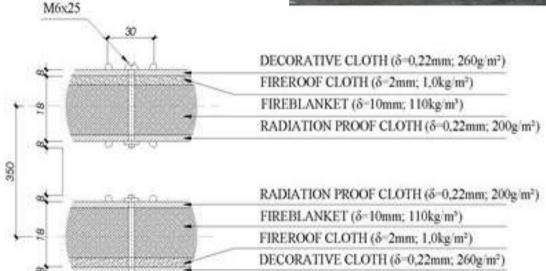

- Prevent the spread of smoke.
- Curtain leads smoke, by which smoke is directed to the exit direction.
- Stationary smoke at elevators and stairs from safe areas and actively isolate them.
- •Concentrated smoke in lobby, skylight area

#### **SMOKE CURTAINS & FIREPROOF CURTAINS**

#### FIREPROOF CURTAINS

Fire curtains are capable of operating during a fire, even during a power outage. Prevent the rapid spread of fire and smoke in the building, help evacuate people in distress and assist with rescue services

The structure of fireproof screen consist of 2 main parts:

- Decorative cloth
- Fiberoof cloth
- Fireblanket
- Radiation proof cloth

Fireproof screen is a revolutionary product, solution on aesthetic and space, an alternative to:

- Fireproof rolling shutter
- Fireproof steel door
- Fireproof glass door

#### **DISTRIBUTION AGENT**

AMAVI SOLUTION is proud to be the distributor of ASSA ABLOY fire curtain system of De Nhat Solution Joint Stock Company.

#### FIREPROOF INSULATION WOODEN DOORS

#### WARP RESISTANT TREATMENT TECHNOLOGY

Natural wood high-class doors are wood that has been cured at temperatures as high as 230 °C to destroy the nutrients on the wood surface and recreate the water absorption function of the wood. This is the best way to remove water, enhance the anti-corrosion properties of the wood, and minimize the appearance of cracking, deformation and other phenomena. Different carbonization processes are carried out according to the moisture content of the wood in each area, which can meet the needs of users in each region.

#### Pass the test, and be recognized by the IBST Institute:

- Wooden door with 2 wings, with glass panes: EI70
- Single-leaf wooden door: El60; El90 and El120

## **WORKING PROCESS, MANAGEMENT, CONTROL**

- 1. According to standard: ISO 9001:2015
- 2. Quality standards of raw materials and products: based on US market standards and supplemented according to specific customer requirements.
- 3. Working process: APPROVAL -> PROVIDED DRAWING, SAMPLE -> PRODUCT SAMPLE -> FIRST PRODUCT APPROVEL -> PRODUCTION
- 4. Progress management: AGREE -> PLAN -> PERFORMANCE REPORT
